The information provided in the descriptions of the respective products does not claim to be complete. The conformity of the products with the applicable rules, regulations, laws, as well as the marketability (in particular on permitted ingredients, dosages and health claims) in individual countries was not verified by Nutrilo and must be carried out and ensured by the customer for distribution and marketing in the respective countries.

VITAMINS AND MINERALS

Vitamins and minerals are extremely important for the performance of the human organism. They are substances that the body desperately needs, but cannot produce itself – with a few exceptions. Intensive physical efforts, stress, unbalanced nutrition and dieting can cause an increase of their demand.

Our products are high quality food supplements, produced and controlled according to international guidelines of quality.

IMMUNE SYSTEM

In the cold season, it is particularly important to ensure adequate nutrient supply. Vitamins and trace elements are relevant for the function of the human organism. Our body's defenses are exposed to numerous daily stress.

Vitamin C and zinc support the normal function of the immune system and help protecting the cells against oxidative stress, which can be caused by free radicals.

Nothing makes us happier than to move if our muscles, joints and bones work smoothly. In addition to physical activity, it is important to supply our bones and muscles with sufficient nutrients.

For example calcium is needed for the maintenance of normal bones and teeth. It contributes to normal blood clotting and combined with magnesium it is important for the normal muscle function.
