Are you looking for a contract manufacturer for the development and production of high-quality food supplements meeting your individual requirements? We are your partner of choice!

Since 1984 we have been producing first-class nutritional supplements and functional food as a member of the PHW Group for national and international customers. Our head office is located in Cuxhaven on the North Sea coast, ideally located for international shipping.

You can either choose from a variety of active ingredients for their individual product or we can rebuild an established formulation from the market for you.

As your partner we support you throughout the entire process, from the development of the formulation to the finished product with your individual packaging.

Due to our long-term experience we have access to recognized active ingredients of the finest quality. In order to meet the high standards of our customers, consumers and ourselves, we carry out certifications according to the global standards of GMP (Good Manufacturing Practice) and BRC (British Retail Consortiums) at the level A+ and IFS Food (International Featured Standard) at higher level which are regularly reviewed by auditors of accredited certification authorities.

Whether tablets, capsules, drinking powders or direct powders – thanks to our extensive know-how we are capable to offer you nutritional supplements in all required dosage forms.

You have the choice when it comes to selecting the flavour. We have a great range of delicious flavours, always looking out for new combinations.

Convince yourself of our versatile.

Vitamins and minerals are extremely important for the performance of the human organism. They are substances that the body desperately needs, but cannot produce itself – with a few exceptions. Intensive physical efforts, stress, unbalanced nutrition and dieting can cause an increase of their demand. Our products are high quality food supplements, produced and controlled according to international guidelines of quality.

PURAFIT VITAMIN C 180

EFFERVESCENT TABLETS

Vitamin C is an **essential vitamin** that cannot be produced by the body itself.

- Vitamin C contributes to the normal function of the immune system.

CUXAN CALCIUM 500

EFFERVESCENT TABLETS

Calcium is a **essential mineral** that plays an important role in numerous bodily functions. It is mainly known for its importance for bones and teeth, but it is also important for muscle function.

- Calcium contributes to the maintenance of normal bone.

Content: 20 tablets per tube
Flavour: Lemon

ART.-NO. 79-726

Nutritional Values per tablet (4.5 g)	
Calcium	500 mg (63 % RI*)

PURAFIT CALCIUM 1000

EFFERVESCENT TABLETS

Calcium is quantitatively the most important mineral in the human organism. The body stock is about one kilogram. About 99 percent of it is bound in the skeleton (and enamel) and ensures the strength and stability of these tissues. This is why calcium is often referred to as a „bone mineral“.

- Calcium contributes to normal muscle function and to the maintenance of normal bones.

Content: 14 tablets per tube
Flavour: Orange

ART.-NO. 79-958

Nutritional Values per tablet (6.7 g)

PURAFIT + INTENSIVE L-CITRULLIN AND L-ARGININ

EFFERVESCENT TABLETS

purafit + INTENSIVE L-CITRULLIN AND L-ARGININ is a combined preparation which makes the enormous potential of arginine fully fertile: by combining arginine with its precursor L-citrulline.

This product is a power booster for the muscle pump. Arginine develops its effect immediately. Citrulline is transformed into arginine in the body with a time delay and ensures that the arginine level in the blood remains high for longer.

- Magnesium contributes to normal muscle function.
- Zinc contributes to normal protein synthesis and to normal macronutrient metabolism.
- Selenium contributes to the protection of cells from oxidative stress.
- Vitamin C and vitamin B₂ contributes to normal energy-yielding metabolism.
- Vitamin B₆ contributes to normal protein and glycogen metabolism.
- Vitamin B₁₂ contributes to normal homocysteine metabolism and to the reduction of tiredness and fatigue.
- Folate contributes to normal amino acid synthesis.
